

Telebehavioral Virtual Clinic And Web-Based Behavioral Health Record System

Grigoriy Gadiyak, PhD, Valeriya Gadiyak, PhD, William Parker, MS, COL Ronald K. Poropatich, MD, COL Swarnalatha Prasanna, MD, COL Steve Cozza, MC
Walter Reed Army Medical Center

Why Web-Based Behavioral Health Record System?

- Distance between the virtual provider and the patient
- Increased quality and continuity of care
- Real time communication with the multidisciplinary team
- Better tracking and accountability
- Decreasing manual workload of faxing patient information
- Improving security of patient information
- Single record for single patient

Hierarchy of Layered Privileges:

- Different privileges ensure a different main menu and different list of patient records.

List of different user types for provider's portal:
